SOC :	Sociology, social
STAT, STATS :	Statistics/Statistique
UNIV :	University/Université

INTRODUCTORY NOTE

The present issue of the Directory of African Statisticians contains the names of 1,969 professional statisticians compared with 1,461 in the 1979 edition and 1,194 in the 1975 edition, i.e. an increase of approximately 39 per cent during the period 1975-1981.

It should however be indicated that only 26 countries and 5 national and international agencies participated wholly or partially in the 1981 survey organized for that purpose, despite the letters and cables sent by the secretariat to all the countries of the region as well as to interested agencies. The secretariat had therefore to use the information contained in the previous Directory for the countries and agencies which failed to send their contribution. Four new countries have been included : Comoros, Djibouti, Sao Tome and Principe and Zimbabwe.

As in the previous issue, African statisticians are listed under their countries of origin while non-Africans, working in the region at the time of the survey, are classified according to either their countries of origin or their supporting agencies. Since the present issue has been processed manually, it was not possible, within the time available, to prepare an alphabetical list of all statisticians.

In the country or agency list, the statisticians are classified in alphabetical order. The year of birth, when it is available, is indicated after the name of the individual concerned, then follow the abbreviation(s) of the title(s) of the qualifications, the year(s) when obtained and the university or institute where training was received. Finally, the office address and the present post occupied by the individual are also shown. It should be noted that some of the information received were not complete.

It is the hope of the secretariat that all the member countries of the region as well as interested agencies will participate in the 1983 survey to enable ECA to maintain a computerized file which will contribute to improve the publication.

NOTE D'INTRODUCTION

La présente édition du Répertoire des statisticiens africains contient une liste de 1 969 statisticiens du niveau supérieur, contre 1 401 et 1 194 respectivement pour les éditions de 1979 et de 1975, soit une augmentation d'environ 39 pour cent au cours de la période 1975-1981.

Il faudrait toutefois indiquer que seulement 26 pays et 5 institutions nationales et internationales ont participé de façon complète ou partielle à l'enquête de 1981 qui a été organisée à cet effet, et ce malgré les lettres et les télégrammes qui ont été envoyés par le secrétariat à tous les pays de la région ainsi qu'aux institutions intéressées. Par conséquent, le secrétariat a dû utiliser les renseignements contenus dans le précédent Répertoire pour les pays et institutions qui n'ont pas envoyé leurs contributions. Quatre nouveaux pays ont été inclus, à savoir : les Comores, Djibouti, Sao Tomé et Principe et Zimbabwe.

Comme dans l'édition précédente, les statisticiens africains sont classés d'après leur pays d'origine tandis que les non-africains, en poste dans la région au moment de l'enquête, le sont soit d'après leur pays d'origine soit selon l'institution qui les finance. Comme la présente édition a été exploitée manuellement, il n'a pas été possible de préparer une liste alphabétique de tous les statisticiens dans les délais impartis.

Dans la liste par pays ou par institution, les statisticiens sont classés par ordre alphabétique. L'année de naissance, lorsqu'elle est disponible, figure à côté de chaque nom. Viennent ensuite le titre du diplôme, en abrégé, l'année d'obtention de ce diplôme et l'université ou l'institut de formation. On a indiqué dans certains cas deux ou trois diplômes. Enfin, on a mentionné l'adresse professionnelle et le poste occupé par chaque statisticien. Il faudrait mentionner que certains renseignements reçus ne sont pas complets.

Le secrétariat espère que tous les pays membres de la région ainsi que les institutions intéressées participeront à l'enquête de 1983 afin de permettre à la CEA de mettre à jour un fichier automatisé qui contribuera à l'amélioration de la publication.
